

PRODUCT CARE INSTRUCTIONS

GARMENTS

Our garments are made using high quality materials under strict quality control conditions. It should be noted that most fabrics discolour due to staining by substances such as mud and grass which may not be entirely removed by washing.

We recommend removing as much mud from the garment as possible before soaking/washing. Follow detergent manufacturers' instructions particularly with powders/liquids designed for heavy stains. Avoid products containing chlorine bleach that may damage fabrics, trims and decoratives.

Soaking garments in water and detergent as soon as possible can reduce discolouration. Use at least an equal amount of water by volume to that of the garments being soaked/washed. Make sure all parts are fully immersed. Pale garments such as White, Yellow, Sky and Tangerine may require more attention and the use of pre-wash soakers will assist in the removal of stains.

Do not overfill the washing machine with garments since if the ratio of water to garments is too small, dirt can easily be re-deposited. This can stain all the garments grey.

We do not recommend fabric conditioners on jerseys and shorts which may cause a build up of film on fibres. This can prevent the washing process from penetrating filaments and dislodging dirt. However, socks will benefit from fabric conditioners and softeners.

Mitre will not accept liability for discolouration or damage to garments which is attributable to staining caused by elements foreign to the materials used in manufacture.

SHIN GUARDS

Mitre shin guards should be wiped clean using lukewarm water and be allowed to dry naturally at room temperature. In order to prevent damage to the shin guard, do not place on hot surfaces such as radiators.

GOALKEEPER GLOVES

The latex rubber used to manufacture Mitre gloves is of the finest quality giving optimum performance in both wet and dry conditions. Please take great

care as due to the soft nature of the material, we cannot guarantee protection against high and sustained abrasion.

To ensure the best grip, latex should be washed in warm water prior to first use. Never use detergents or soaps and never use water above 30°C.

All latex palms should be moistened with clean, warm water before each use.

Hang gloves individually. Do not dry gloves in direct heat or near radiators.

FOOTBALLS

Care should be taken when inserting the inflation needle into the ball to prevent damaging the valve and bladder. Mitre Glycerine should be used to allow the needle to be inserted smoothly. This is particularly important on the initial inflation as the wall of the bladder can be punctured if the needle is pushed too far before the air is pumped in.

The amount of pressure in the ball will significantly affect the performance and durability of the ball. Pressure should be checked regularly as not only do balls gradually lose air through the wall of the bladder, but temperature can also alter the pressure by 1 psi for every 10°C.

The recommended pressure is printed on the ball and this should be checked regularly using a Mitre pressure gauge. Do not exceed the recommended pressure, this may damage the ball and its performance.

If the ball gets wet during play, it should be dried in an airy place and not force dried with heat as this will damage the ball.

CHOOSE THE RIGHT SIZE

Tops

If your height suggests a different size to your chest measurement it is better to follow the chest measurement for the best fit.

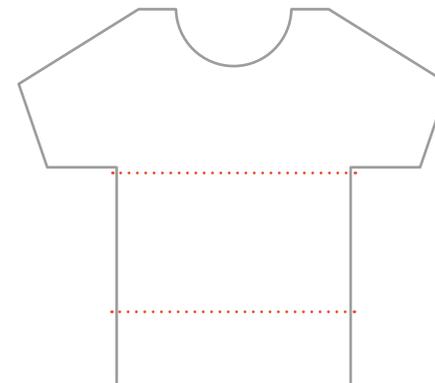

If your body measurements fall between two sizes you could order the lower size if you prefer a tighter fit, or the higher size for a looser fit.

Chest

Measure around the fullest area of the chest with a flexible tape measure, holding the tape measure horizontal

Waist

Measure around the narrowest part of the waist, keeping the tape measure horizontal.
