THE STARTING POINT FOR YOUR CREATIVE IDEAS

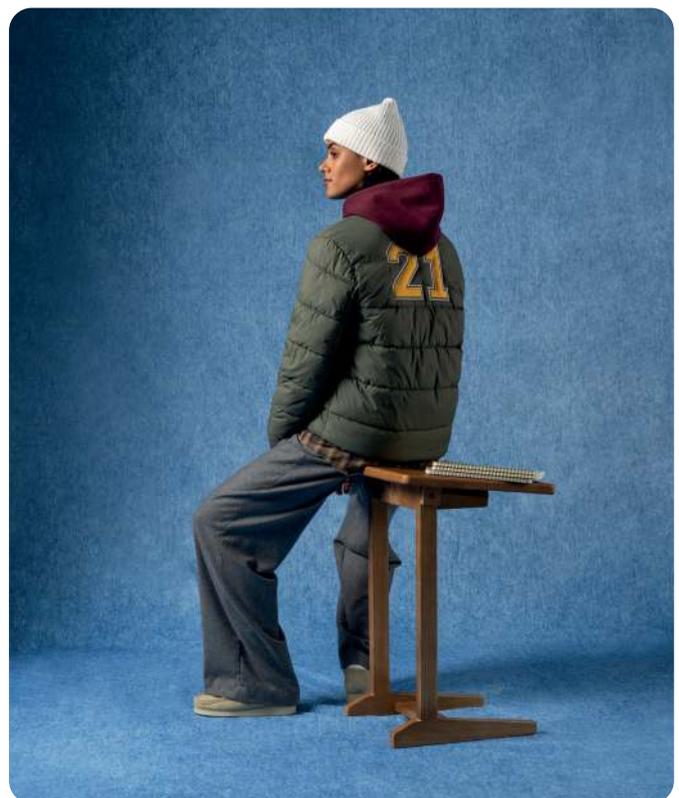

NATIVE SPIRIT

At Native Spirit, we design garments for textile professionals seeking on-trend, high-quality pieces ready for personalisation.

Our collection features modern essentials—blank and label-free—designed to form the foundation of any brand identity.

What sets us apart? A commitment to quality at every stage: certified fabrics, responsible choices, and carefully managed sustainable design.

We offer a full wardrobe for all styles, genders, and generations: from oversized sweatshirts to classic T-shirts and more technical pieces, our range is aligned with today's trends while maintaining timeless appeal.

Driven by a more responsible vision of fashion, we carefully select sustainable materials: organic cotton, recycled, or bio-based fabrics. Our products are certified by trusted labels, ensuring traceability, production reliability, and the highest quality standards.

Each garment is designed as a true creative canvas—ready to bring our clients' ideas to life.

AN OFFER DESIGNED TO LAST AND INSPIRE

Our collection is built to stand the test of time and provides textile professionals with the ideal foundation for creating a sustainable wardrobe tailored to every project. We offer a wide selection of 100% no-label essentials, combining durability and quality, for men, women, and children. On-trend pieces designed to meet the growing demand for more responsible fashion.

INSPIRED BY THE REAL AND THE TIMELESS

Each collection is shaped by what inspires us: sustainable materials, nature-inspired colour palettes, and everyday moments that fuel our creativity. Blending heritage with modernity, we envision the fashion of tomorrow through authenticity and boldness. Our colour choices serve as a visual signature, giving each piece a unique and meaningful identity.

STRONG COMMITMENTS FOR TRANSPARENT PRODUCTION

Trust and ethics are at the heart of everything we do. Our partner factories comply with international certification standards such as WRAP, SA 8000 or BSCI, and are audited by AMFORSI to ensure continuous monitoring and improvement of our supply chain. This guarantees a controlled, responsible production process that meets the highest industry standards.

CERTIFIED MATERIALS FOR UNCOMPROMISING QUALITY

We use only sustainable materials for our wardrobe: organic cotton, recycled fibres, or plant-based alternatives. Each of our products is certified by recognised labels, ensuring traceability and reliability. Quality is at the core of our process, providing professionals with eco-responsible, durable garments, perfectly suited for personalisation.

OUR CERTIFICATIONS

We pay particular attention to the composition of our clothing, which is why we're committed to professionals by offering clothes and accessories that are certified and controlled by strict labels.

We have built a relationship of trust with our partners, carefully chosen for their social, ethical and environmental commitment. All our factories are certified by one or more of these certification labels and are committed to using controlled and approved materials in the production of our collections.

EGL N°165651 / NATIVE SPIRIT

The GOTS (Global Organic Textile Standard) certification is the strictest when it comes to textiles made from organic fibres. It tracks the entire production chain from the cotton fields, through harvesting, yarn manufacturing, the finished product before printing, and even clothing export.

EGL N°165651 / NATIVE SPIRIT

The OCS (Organic Content Standard) certification is dedicated to items designed with a minimum of 5% and a maximum of 94% organic raw materials blended with conventional or synthetic raw materials. OCS 100 contains at least 95% organic materials.

EGL N°165651 / NATIVE SPIRIT

EGL N°165651 / NATIVE SPIRIT

The RCS (Recycled Content Standard) standard checks the presence and proportion of recycled content in a product. The production chain is carefully verified by a third-party organisation to guarantee transparency. RCS Blended contains a minimum of 5% and a maximum of 94% recycled materials.

EGL N°165651 / NATIVE SPIRIT

The GRS (Global Recycled Standard) aims to control the recycled content of intermediate and finished products. This is to ensure that the manufacturing process, social and environmental practices of companies are sustainable and responsible.

EGL N°165651 / NATIVE SPIRIT

The RWS is a voluntary international standard that addresses animal welfare on sheep farms and throughout the wool chain of custody from certified farms to the finished product.

The OEKO-TEX® STANDARD 100 label is an international certification that meets the needs of stakeholders in the textile supply chain and consumers in terms of protecting human health. It guarantees the chemical safety of the labelled products.

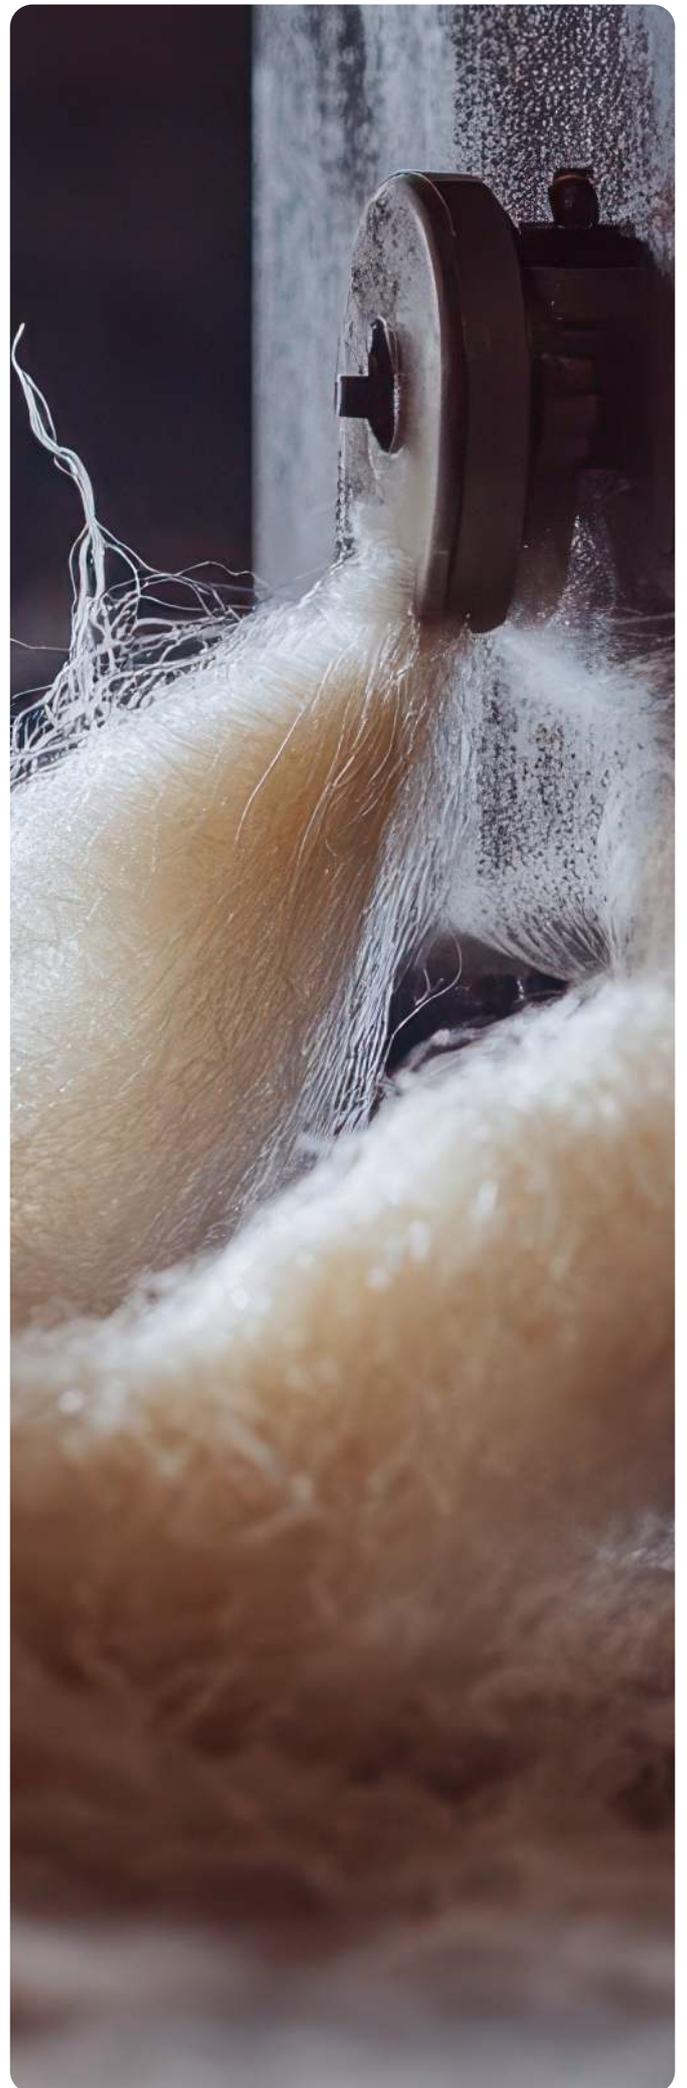

Amfori monitors our supply chain to improve human prosperity, use natural resources responsibly and promote open global trade.

The **"PETA-Approved Vegan"** logo is used to highlight clothing made of vegan alternatives to animal-derived materials, such as leather, fur, silk and feathers. The logo helps consumers identify vegan items at a glance while shopping and make purchases that align with their values.

Sorona® is a partially plant-based polymer. An innovative material, it is used in the padding of our down jackets and is an eco-responsible alternative to replace fur or other animal feather paddings. Sorona® is a trademark registered by Affiliates of DuPont de Nemours, Inc. used under licence.

OUR FABRICS

At Native Spirit, each fabric embodies a unique know-how and a deep respect for our environment. Our materials, chosen for their durability and quality, are carefully woven and knitted to give each piece a story that accompanies you. Discover noble and eco-responsible textiles, designed to last and enhance your committed fashion projects.

BRUSHED FLEECE

Brushed fleece is made by brushing the fabric to bring out the fibres, resulting in a soft inner surface. Provides comfort and warmth.

PIQUÉ KNIT

Piqué knit has a seductive textured structure, creating raised patterns that combine visual appeal with ease of movement. It offers a distinctive look and great durability.

TERRY TOWEL

Terry towelling, a trend from the 70s and 80s, is making a comeback in wardrobes. Pleasant to wear all year round, this fabric is absorbent and breathable, as well as being hardwearing and durable.

FRENCH TERRY

French Terry is a knit with an unbrushed inner surface, a looped finish on the inside and a smooth surface on the outside, for lightweight, wearable pieces.

COTTON TWILL

Cotton twill, known for its herringbone pattern due to its diagonal weave, is robust and hard-wearing. Soft to the touch, it produces a garment that combines functionality and durability.

SHERPA

Sherpa is characterised by its soft, fluffy feel, which mimics sheep's wool. Popular for its warmth, it provides cosiness and comfort as well as being fashionable.

COMBED COTTON

Combed cotton is obtained by a combing process that eliminates short fibres and impurities, creating a smooth, strong and durable fabric. It gives a clean surface and a soft touch. The garment is pleasant to wear and gives better print quality.

JERSEY

Jersey is a soft, stretchy fabric with a regular knit. Its knitted mesh structure offers great elasticity.

CORDUROY

Corduroy is the trend of the moment, with its soft texture and varying degrees of ribbing. Popular for its modern, bold style, it is used in clothing and accessories to create an on-trend look. Available in 100% organic cotton in our collection.

OUR COLOUR PALETTE

Between natural horizons and urban landscapes, we draw our colours from the images that shape everyday life: the deep blue of a city sky, the sun-worn limewash of an old wall, the mineral shades of a beach, or the vibrant green of pine trees. Whether natural or urban, these scenes feed our creativity and inspire our choice of hues.

This year, our palette celebrates light, boldness, and vitality. Three colours, three stories: a sunlit yellow that captures the energy of bright days, a deep violet that evokes the elegance of twilight, and a vibrant green that connects nature with the lines of the city.

OUR FITS

At Native Spirit, we understand that every project requires garments with specific features. That's why we've developed a range of different fits, designed to satisfy all kinds of tastes and be suitable for every body shape.

Available in a wide range of sizes, these fits offer ideal solutions for all your professional needs, whether for corporate, event or retail collections.

Let's take a closer look at three of our top fits, easily recognisable by the chest size and the way they fall.

STRAIGHT FIT	REGULAR FIT	OVERSIZE FIT
--------------	-------------	--------------

STRAIGHT FIT: PRECISION AND MODERN APPEAL

Features: a straight fit slightly tapered at the waist for shirts. Positioned between a slim and regular fit, it delivers a classic and versatile silhouette with a structured, elegant drape.

Ideal for: premium or corporate projects requiring a refined appearance.

**THE REGULAR FIT:
TIMELESS VERSATILITY**

Features: a balanced, clean-lined silhouette, with a parallel fit that ensures optimum comfort while adapting to all body shapes.

Two versions:

- The classic regular fit, for a sober, universal look.
- The regular fit with dropped shoulders for a more modern, relaxed style.

Ideal for: all types of projects- professional, events and casual.

**THE OVERSIZE FIT:
COMFORT AND CASUAL STYLE**

Features: a loose, fashionable fit with low shoulders for a relaxed, casual effect. This high-waisted style offers great freedom of movement.

Ideal for: fashion or lifestyle projects where comfort and a contemporary feel are the main expectations.

HOW TO PERSONALISE?

Our collections are designed to give free rein to your creativity. At the heart of range, 100% no-label blank products are equipped with tear-off size tags, ready to adapt to your textile customisation needs. We highlight different marking techniques to guide you towards the best option depending on the material, weight of the product, quantities to be customised, etc. At Native Spirit, each garment becomes a canvas and each customisation technique a unique signature.

SCREEN PRINTING

Screen printing is one of the oldest and most popular methods of customisation, decorating textiles by laying ink on the fabric using an openwork screen. Favoured for its superior quality, durability and visual appeal, this time-honoured technique is particularly suited to large volumes and a wide range of materials.

DIRECT TO GARMENT (DTG)

Direct-to-garment printing, known as DTG, is an innovative printing method for reproducing all types of decoration. Using a special printer, the ink is applied directly into the fibres of the textile, enabling detailed reproduction of the patterns. This is a fast, high-quality process that we recommend using on fabrics made from at least 70% cotton, for optimum results.

DIRECT TO FILM (DTF)

DTF is an innovative technique that uses film printing to create detailed patterns. After printing on a special film, a hot-melt powder is applied and the design is transferred using heat and pressure. It is suitable for all types of fabric and is popular for its soft, fine feel, resistance and durability.

TRANSFER

Transfer is a flocking system that involves printing the design onto a fusible backing and then transferring it to the textile using heat and pressure. This technique is effective for precise customisation with elaborate designs and offers flexibility for small runs and original artistic creations. This process is less expensive than some others, but should be used with care on materials such as nylon, wool or fleece.

EMBROIDERY

Embroidery is a delicate art that involves sewing threads onto fabric to create raised designs. This customisation technique is prized for its timeless elegance, strength and durability. It can be applied to a wide variety of materials, but it is advisable to use textiles weighing at least 180gsm.

SIZING GUIDE (INCHES)

The Native Spirit size guide for men, women and children will help you choose the right size and create an eco-friendly wardrobe suited to your body type.

Take your measurements on the body itself, without over-tightening. If you're between sizes, go for the larger size.

Measure the breasts at the fullest part and, if possible, with your bra on.

Measure the waist at the narrowest part of the waist.

Measure the hips at the widest part of the hips.

GLOSSARY

in conversion cotton

Cotton said to be "in conversion" is cotton grown according to organic standards in its transition period and is certified organic in conversion. It maintains and/or improves soil fertility and uses less water and energy than conventional cotton.

slub cotton

Fancy yarn with irregularities.

LSF

Low Shrinkage Fleece: high quality fleece with low shrinkage. The inner and outer faces of the fabric contain a continuous filament that offers excellent resistance to washing. The outer face is perfect for printing, while the inner face is extremely comfortable.

LST

Low Shrinkage Terry: high-quality French Terry treated to significantly reduce shrinkage, perfect printing, excellent comfort.

pre-consumer recycled materials

Materials that come from waste generated during a manufacturing process. Excluded is the reuse of materials that come from a production process and that can be recovered in the same process that generates them.

post-consumer recycled materials

Materials that come from consumption waste generated by households or by industries and businesses in their role as end-users. This includes returns of materials from the distribution chain.

micro twill

Ultra-fine weave made of thin and flexible yarns that brings style to the material and movement to the garment.

rip-stop

A square arrangement of warp and weft threads to prevent the propagation of tears.

water repellent

Water-repellent fabrics are fabrics that have been treated to repel water. Water then runs off in droplet form and cannot soak into the fabric, preserving breathability.

waterproof

Waterproof garment or fabric. The figure shown refers to the water column, in other words, the fabric's ability to resist water pressure without allowing moisture to penetrate. The minimum standard is a water column of 1300 mm/m².

enzyme wash

A cleaning process using enzymes to improve the appearance of the fabric, removing excess fibres from surfaces to achieve a perfect printing surface and a very soft feel.

sorona

Sorona® is a polyester microfibre consisting of approximately 38% plant-based fibres, principally from maize. Popular for its softness, strength and insulating properties, this durable material perfectly imitates animal feathers and faux fur.

For technical reasons, the colours printed in this catalogue have no contractual value and may differ from reality. Any typographical errors in this catalogue is not binding on Native Spirit in any way whatsoever.
